Grade 10

What Obtaining the Scholarship
Would mean to me and Why I would
like the opportunity to attend JEPPE

I think obtaining this scholarship will be my first big step of my journey and of making my dreams come true. And I will be industrious to make them come true.

My first dream at JEPPE as I will be still at school, is to proceed with what I am at uDunro. To be a top student in school work. Because I always desire to impress every teacher who teaches me by doing well in his or her subjects. And I do not believe that there is any student that could do better than I do in school work.

And my second dream at JEPPE is to learn and reach grade 12. In grade 12 I want to pass all my subject with distinction. That why I would like the opportunity to attend JEPPE.

I was told that JEPPE is one of the best school in the world. And I know that I will get quality education I had always wished to get, teachers of high quality and teachers that have experience we need as students.

As a boy who comes from a bad background, I think attending JEPPE will help me to realise my potential, and I think it will be easy for me to get a bursary for my further education at University. Because I want to finish the course of my career and work so as to be able to change where I am coming from and improve my family's standard of living.

Obtaining this scholarship would be of great success in my future. It will be my greatest achievement because it will ensure a great future. To get this opportunity would mean a lot to me. And I will do my best as a hard worker.

I would be happy to get this scholarship.
